Make a Mountain out of a Map

MOUNT EVEREST
The challenge of Mt. Everest...

Highest peak on earth at 5 1/2 miles ...
(29,035 ft, or 8850 m)

Icy winds, sub-zero temperatures ...

Just 1/3 of the air at sea level...
Taking on the challenge…

An English party made the 1st attempt at the summit in 1922. Reached 27,000 ft. …

Sir Edmund Hillary and Sherpa Tenzing Norgay made the first successful climb to the summit 1953 …

50 years later, more than 1,000 people have reached the summit.
Build Mt. Everest

Stack the styrofoam pieces of contour map so that you build Mt. Everest.

Can you match the map with the picture? See if you can locate on the map the slope shown in the picture.

Can you find the place on the map where the photographer stood to take the picture?
