

## Reading the scale:

Between 1 and 2 there are small numbers written at every ten marks. These are tenths. The markings in between are hundredths.

The red arrow is at 1.78:

Between 2 and 4 the larger marks represent tenths and the smaller marks are each .02. The red arrow is at 3.42.

Between 4 and 10 the larger marks are tenths and the smaller marks are each .05. If the number is between the marks, you need to estimate where it should be. The red arrow is approximately at 7.33.
